WHY A MEDIKUS?

This question, which everybody who intends to purchase a high frequency apparatus should ask himself, may be answered here by stating the following advantages of our **Medikus**.

The MEDIKUS High Frequency Apparatus is made of the best material, it is an instrument of precision that has been improved and perfected during many years of experiment, has been tested a thousand times, and is highly recommended.

The Medikus is very easily manipulated and can be attached to any existing electric current. Its installation is simplicity itself, the operation and handling absolutely free of danger, and its use of electric current extremely low.

The material of which the Medikus apparatus and handles are made is an insulating material of unquestionable quality recommended by the German Electrotechnic Union.

The Medikus Condenser is absolutely circuit-proof, and the apparatus is guaranteed free from ground leakage.

The Medikus functions without trouble, and is, therefore, an apparatus of excellent quality throughout.

When purchasing, therefore,

BUY A MEDIKUS!

“MEDIKUS” IS REALLY A UNIVERSAL HELP IN MANY KINDS OF DISEASE, even in old and stubborn ailments; it also acts as a preventive of disease and is just as successful in beauty culture, infant care and massage for sportsmen. Regular MEDIKUS high frequency treatment is easy and can be applied without interrupting work!

“MEDIKUS” HIGH FREQUENCY VIOLET RAYS
make living a pleasure—promote health.

“MEDIKUS” HIGH FREQUENCY RAYS
are health building electric violet rays of the most
sensitive penetration.

The use of high frequency currents has already become quite common, due to their effects in health treatments now generally recognized. They have been in use by Doctors and at Clinics and Sanatoriums for many years.

According to Dr. Weber, Berlin, the electric heat of the high frequency current penetrates more deeply into the tissues than the heat from hot water or from an electric light bulb. It promotes a strong circulation of fresh blood by which the inflammation of diseased parts is prevented. Pains in the joints, dislocations, muscular rheumatism, inflammation of the internal organs, etc., are relieved under the influence of electric heat and the pains eliminated.

The EFFECT ON HEALTH of high frequency currents is based, according to Professor Mann, Breslau, upon setting up an irritation of the skin which can be regulated at will and which is brought about by adjusting the flow of the current, as well as by varying the distance of the electrode from the part of the body that is under treatment. The heat produced by the diathermic applications within the tissue itself is an additional factor, as is also the fine but strong flow of blood through the tissues treated.

THE VITALIZING EFFECT OF HIGH FREQUENCY CURRENTS, OF OZONE CURRENTS, relieves the nervous strain of an overworked body, improves the general health, accelerates the fluids of the body, induces metabolism, produces better and easier breathing, influences the kidneys through an increased evacuation of urine, improves the circulation of the blood and consequently indirectly relieves the strain on the heart.

THE HIGH FREQUENCY CURRENT IS AN INCOMPARABLE HEALTH TREATMENT!

According to Dr. Monnel, high frequency current as a whole, considered in its various applications, constitutes an incomparable health treatment for the purpose of strengthening the nerves in general and promoting the functions of the brain. It builds and feeds the muscles and the blood, destroys unhealthy, foreign and diseased matter, and physiologically energizes the entire human body.
